## ABOUT THE CONFERENCE

**SNHC India** started organising a 2 day National Conference on "Lesser known species of Madhya Pradesh" with the vision of Wildlife Conservation and sensitisation to youth as well as people in conservation, to plan and highlight conservation efforts and management challenges of Lesser Known species. Lesser known as in, species with very low distribution, less researched, rapid population decline, data deficient and Endangered.

To fill the conservation gap the first conference was organised in **Jan 2023** followed by 2nd and 3rd in **Jan 2024 & 25** respectively, with expected outcome being, to come up with better conservation action plans and management strategies for these species through utilisation of available research data focusing on their current status, conservation issues or challenges and the way forward that is recommendations from the researchers and scientists for the implementing agencies like Forest Departments, Forestry & Wildlife institutes and NGO's to execute on the field and if data is deficient or not available in any of the species then detailed research is suggested to analyse the issues as without that nothing can be figured out.

In the first 2 days of the conference, around 15 technical sessions are held in which speakers share their rich experience and hard work in the field and throw light on different aspects of Biology to Ecology, from conservation challenges to conservation strategies. People active in the field of nature conservation come together under one roof to plan and act for the conservation of these lesser-known species.

For a broader and more scientific approach after conducting our 3rd Conference in Jan 2025 we are moving to Landscape conservation resulting in the addition of around 08 more states and a lot more diverse lesser-known species seeking attention there. The conference will now be titled as "**National Conference on Lesser-Known Species of Central Indian Landscape**" which will be a pivotal step in strengthening the conservation community of Central India.

**SNHC India** is trying to fill the gap and strengthen the conservation community of Central India by highlighting very important and much needed topics of lesser-known species that are equally important as flagship species. We in Collaboration with **MP State Biodiversity Board** are coming up with the 4th edition of the conference in **Jan 2026** to push the conservation efforts & Management plans of lesser known Faunal species of Central Indian landscape.

### ABOUT MPSBB

Madhya Pradesh State Biodiversity Board has been constituted by the State Government as per the provisions of Biological Diversity Act, 2002 notified by the Government of India. Objectives of the Board being Conservation of biodiversity, Sustainable use of its components and Equitable sharing of benefits arising out of the use of biological resources and associated traditional knowledge.

Board has an advisory role in promoting biodiversity concerns among various stakeholders. One of the focus areas of the board includes promotion of research and advocacy of policy in gap areas. The lesser known faunal species is one such gap area which needs focus and action.

### OUTCOME

- To Make these Lesser-Known, Known among conservation Community.
- To create connection between field and academic work of conservation.
- To give a platform to the national experts of lesser-known species and review the available research data of these species.
- To highlight the conservation efforts & Management Challenges for these species.
- To highlight Lesser-Known Faunal diversity of Central Indian Landscape in National scenario.
- To promote more and more research and study of Lesser-Known Species.
- To propose effective conservation action plans and management strategies for these species.
- Promotion and presentation of Lesser Known Species open windows for new species to be explored and studied by researchers and then tourists respectively and hence new aspects of tourism as well as wildlife can be witnessed rather than the traditional ones.
